Remarks

Applicant respectfully requests reconsideration of this application as amended. Each of the independent claims has been amended. No claims have been canceled or added. Therefore, claims 1-2, 5-9, 11-17, 19, 22-26, 30-31, 33-35, 37-39, 41, 43-46, 50-51, 53, and 56 are presented for examination.

35 U.S.C. §103 Rejection

Claims 1-2, 5-9, 11-17, 19, 22-26, 30-31, 33-35, 37-39, 41, 43-46, 50-51, 53 and 56 stand rejected under 35 U.S.C. §103(a) as being unpatentable over Robinson et al. (U.S. Patent No. 5,522,075) and in view of Shorter (U.S. Patent No. 5,063,500). In response, it is respectfully argued that each of the independent claims of the present application includes at least one limitation not disclosed or rendered obvious by Robinson and/or Shorter.

Specifically, claim 1 requires receiving one of a plurality of VM entry instructions.

Neither Robinson nor Shorter describe or suggest a plurality of VM entry instructions. Also, claim 1 requires identifying, based on whether the instruction is a VM launch or a VM resume instruction, that an initial transition from a VMM to a VM is about to occur. Neither Robinson nor Shorter describe or suggest a plurality of VM entry instructions and therefore cannot describe or suggest any identification based on whether an instruction is one or another of a plurality of VM entry instructions. Also, claim 1 requires utilizing processormanaged resources associated with a VM based on the initial transition. Neither Robinson nor Shorter describe or suggest utilizing processor-managed resources based on an initial transition.
